

Final: Portfolio

* I added more content to my project overall, fixed the GSAP at the beginning and some other bugs. Each project involves a lot of content that I can't finish yet so for now I have completed the PetPals Project completely which is will be the base design for the other projects. I honestly could not figure out the Carousel shift if you can give some advice on it, thanks! 5/9/24-Update

Wireframes

Next Steps:

- Adding some visual effects using GreenSock
- Refining and cleaning up some bugs
 - Fixing carousel to make it cleaner
 - Having the images fit better in the carousel
 - Play around a bit more with colors and fonts
 - Figuring out how to add Game Demos within the website (sort of preview)
